What is Zotero?

- It is a paper manager (bibliographic data and PDF files)
- It is free* and open source
- It is powerful with large degree of freedom for customization

The screenshot displays the Zotero application window. On the left is a sidebar with a tree view of the library structure, including 'My Library' and various subfolders like 'Colonial Medicine'. The main pane shows a list of items with columns for Title, Creator, and Year. The item 'Circulation of Medicine in the Early Modern Atlantic World' by Cook and Walker (2013) is selected. On the right, a detailed view of this item is shown, including its title, authors, abstract, and publication information.

The plan

- I will not cover
 - “How to organize papers”
- I will talk about
 - Zotero as a tool for organizing papers
 - i.e.: the pipeline of
 - Getting the papers from journals
 - Organize the papers in a folder structure
 - Cite the papers
 - My workflow as “what is possible?”

Importing papers: from web

- [Zotero Connector](#)
- A browser plug-in for easy import of papers from journal website

Zotero automatically redirected your request to journals.ametsoc.org through the proxy at proxy.library.nyu.edu.

- It also automatically redirect journal website through saved proxy (e.g.: the [NYU library proxy](#))

Importing papers: from PDF

- Just drag and drop
- Does not work 100%, especially for old papers
- Potentially useful plug-in: [Zotero Folder Import](#)

The screenshot shows a Zotero library interface with a list of papers. A dialog box titled 'PDF Metadata Retrieval' is open, displaying a 'Finished' status with a green progress bar and a 'Close' button. Below the progress bar is a table with two columns: 'PDF Name' and 'Item Name'. The table lists four items, each with a green checkmark in the first column.

The background shows a list of papers with columns for author, title, year, and journal. The list includes papers by Higham, Jing et al., Jones and C, Kumar et al., Moroney et, Newman, Pierrehumbe, Storch et al., Strang, Takatori and, Toner and T, and Vanneste. The paper 'An Algorithmic Introduction to Numerical Simulation of Stochastic Different...' by Higham is highlighted.

Importing papers: from .bib

- It works to add them as Zotero items
- Then one could ask Zotero to find the PDF

The screenshot displays the Zotero application interface. On the left, a list of papers is shown with columns for 'Creator' and 'Title'. The 'Find Available PDFs' dialog box is open, showing a progress bar and a table of search results. A context menu is also visible, with 'Find Available PDF' highlighted.

Importing papers: from other software

- From Mendeley: [link](#)
- From Endnote: [link](#)

Organizing papers: into folders

- Sort the papers into folders within Zotero and (the PDFs) locally

Plug-in: Zotfile

- Rename and move the local PDF files
 - Folders follows the structure in Zotero
 - Name the files according to the citation information (e.g.: author, year, title)

Location of Files

ZotFile can move new and existing attachments to different locations. You can either store a copy of your attachment files in Zotero, which allows you to sync files to the Zotero server, or move the file to a custom folder and link to that location from Zotero

☐ Attach stored copy of file(s)

☒ Custom Location: 

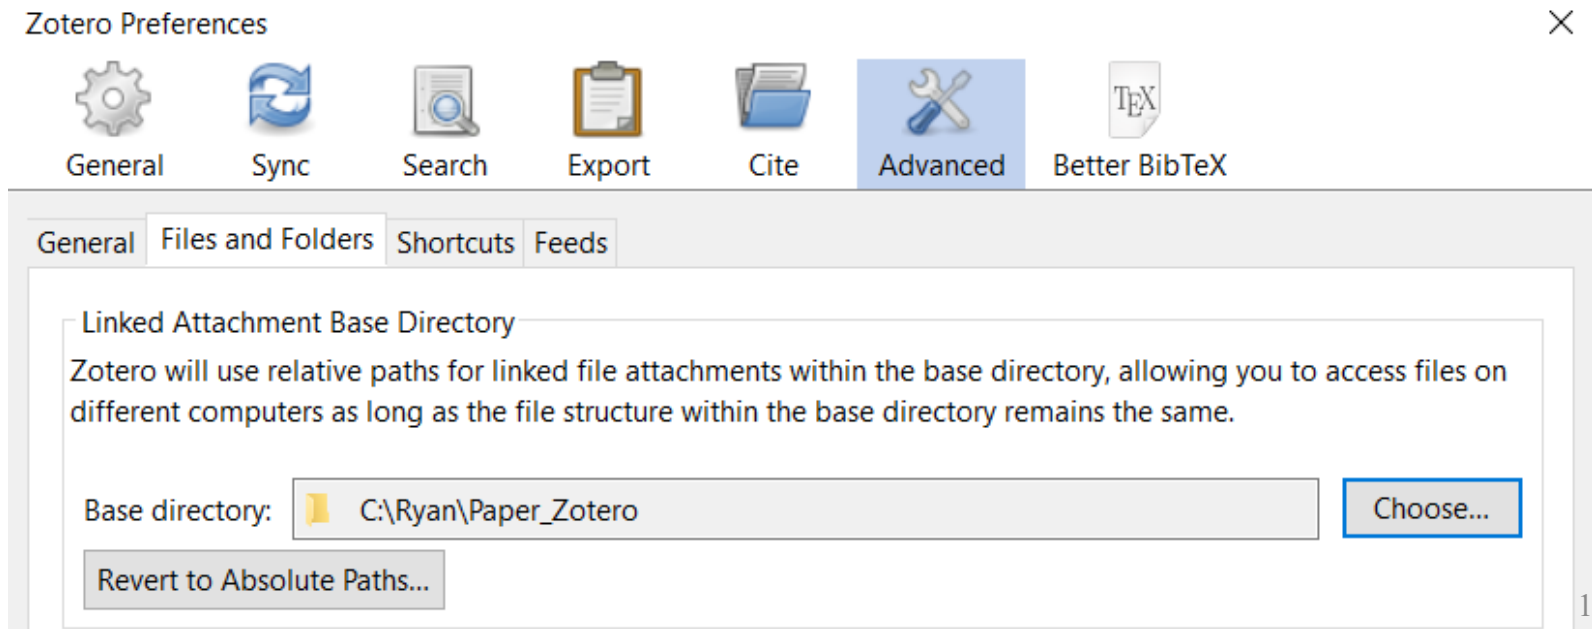

☒ Use subfolder defined by 

Format for all Item Types except Patents

{%F_}{%y_}{%t}

Zotfile for syncing over machines

- For free! ([Here is a detailed tutorial](#))
- Sync the PDFs using a cloud service
- Set Zotero to look for them using a relative path
- This also gives you easy access to your PDFs on tablets

Organizing papers: Other plug-ins

- [Zotero DOI Manager](#)
- [Zotero Citation Counts Manager](#)
- [Zotero Storage Scanner](#)

Citing papers: Better BibTeX

- Zotero works for generating .bib entries
 - But it will include all fields including abstract...
- Better BibTeX let's you do so much more
 - Customize the .bib output

When an item has both a DOI and a URL, export ⓘ

Fields to omit from export (comma-separated):

Include JabRef-specific metadata: ⓘ

- Generate unique citation keys following preferred pattern

Citation key format

☒ Force citation key to plain text

☒ Enable citation key search

Plug-in: Zutilo

- I use it to assign shortcut to:
 - Copy the .bib entry
 - Copy the \cite{...} command
 - Copy the formatted citation in my preferred format
- To set this up is not trivial
 - You have to venture to the “Config Editor”
 - I could not find a good guide for it. [This post](#) is a start.
- It could also expand the options in the right-click menu
